

## **Senior Process Engineer**

Rubicon Minerals Corporation is a well funded, leading, gold exploration company with major land holdings in Red Lake, Ontario, Alaska and Nevada. Rubicon is currently seeking a **Senior Process Engineer** to join our Phoenix Gold Project team in Red Lake , Ontario. The successful candidate will be given the responsibility to lead and manage the mineral processing activities related to the development of the future gold mill (CIL and capacity estimated at 1250 tpd), including the tailings management facilities and the integrated pastefill plant. Experience and proven track record in project management , mill design and paste fill plant design will be an asset, as well as a working knowledge of industry standard software. Must have a strong understanding of the gold milling process, pastefill plant process and tailing management.

The successful candidate must possess a B.Sc. in Mineral Processing Engineering, must be registered Professional Engineer of Ontario and will have a minimum of 10 years of mineral processing experience in the gold industry. The candidate must be a 'hands on' team leader with a proven track record. Strong communications, effective management of consultants and planning skills are essential.

Rubicon Minerals offers generous wages and an attractive incentive package. Remuneration will be commensurate with experience.

We gratefully acknowledge all applicants but only those selected for an interview will be contacted.
